

PROJECT: Office Design and Fit-out

Location: St Vincent Street, Glasgow

Value: £**

Timescale: 16 weeks

The client

Zurich Insurance is one of the world's largest insurance groups, operating on a global basis. Operating from 16 towns / cities in the UK alone, PJE have been a preferred supplier for more than 10 years.

The brief

Design and fit-out of new 1600sqm floor space in BREEAM "excellent" rated building. Create a fun and invigorating environment in keeping with Zurich brand image and Dynamic Working principles.

Project delivery

With a date of May 2018 to move out of their current office, together with long lead times for Building Warrant approval before we could even get started, this project was a very challenging delivery.

Adaptions to the AC in keeping with the BREEAM level requirements, installing bespoke features such as a living wall, LED lighting, access control / abbloy locks and feature joinery with a high spec AV system across the floor created a complicated program. Two PM's on split shifts were used to maximize each day as well as plenty of out of hours work.

"I can't think of an office we have done where there has been so much positive feedback."

Robert James, Zurich Project Manager
